

Brochure

Company Overview

EBBY-TEK SERVICES LIMITED was incorporated a Limited Liability Company under the Companies and Allied Matters Act 1990 on the 24th of August, 2000 with Registration Number RC 388087 as an Engineering Services and Procurement Company. It has grown from a modest beginning to a premier company supplying services and spares to the oil industry. We at Ebby-Tek Services Limited (ETSL) are committed to the technological empowerment of Nigerians through technical partnership with foreign companies, which include training and delivery of quality products and services, in the oil and gas industry.

Mission Statement

ETSL is established to maintain a dynamic organisation where absolute transparency, accountability, professional competence, customer satisfaction and employee welfare are practically demonstrated and applied for provision of safe Engineering, Procurement, Construction, Operation and Maintenance Services (EPCOM) in the Oil, Gas and Petrochemical Industry.

To accomplish this statement, we will:

1. Be responsible, flexible and cost-effective.
2. Provide quality as a non-negotiable necessity.
3. Focus on our client's basic needs.
4. Meet client's requirements on time and within budgets.
5. Provide a level of services superior to our competitors.
6. Continually improve our safety records.
7. Be innovative (constantly improve service and performance).

Our Policies

Quality Policy

EBBY-TEK Services Limited is committed to a policy of Quality Assurance, which is designed to ensure that all work complies with client requirements and expectations while being commercially viable. Our Quality Manual defines the practices and procedures related to the control of quality, and shows how it is an integral part of the Company's management system.

Safety Policy

ETSL is dedicated to the implementation of the highest safety standards through awareness, training, and motivation of her employees towards healthy engineering practices.

Our Industries

- *Petrochemicals
- *Oil Exploration Companies
- *Banks and Financial Houses
- *Allied Industries and Companies
- *Cement Manufacturers
- *Museums
- *Institutions
- *Oil Servicing Companies
- *Vessel Owners
- *Paper Mills
- *Beverage Manufacturers

Why Choose Us?

ETSL is established to maintain a dynamic organisation where absolute transparency, accountability, professional competence, customer satisfaction and employee welfare are practically demonstrated and applied for provision of safe Engineering, Procurement, Construction, Operation and Maintenance Services (EPCOM) in the Oil, Gas and Petrochemical Industry.

1. Our repair department and engineering teams work together to make sure that your system is back in service and functioning according to the designed specifications.
2. Experienced Technicians. Our technicians are constantly tested and trained, so you can be assured that your project will be diagnosed and repaired competently and as quickly as possible.
3. Flexible Scheduling. We understand the affect that required repairs can have on your business. We will work with you to find a solution to minimize the impact on your business.
4. 24-Hour Emergency Response. Malfunctions don't always happen during normal business hours. Our technicians are available 24 hours a day to help keep your business running.

Services Overview

DISTINCT PROFESSIONAL COMPETENCIES

At our facility, the following services are rendered under strict quality assurance and control programme.

- Hydro-testing of pressure vessels (e.g. cylinders, valves and pressure tanks).
- Refilling and recharging of Co2.
- Extinguishers.
- Refilling and recharging of Wheel Unit.
- Extinguishers.
- Recharging of powder agent or DCP extinguisher.
- Recharging/refilling of twin agent units.
- Nitrogen purging of containers. Integrity/hydro test for hoses. Installation, inspection and maintenance of....
- Engineered systems, design, installation, operation and maintenance of engineered fire suppression systems (FM200, Co2, Novec, FE13, Argonite, Inergen, Water mist and Dry chemical systems).
- Pre-engineered restaurant systems, R-102 and Wet chemical systems.
- Inspection/maintenance of foam/water sprinkler systems.
- Inspection and maintenance of CO2 flooding systems.
- Replacement of adapters, fittings and hoses on extinguishers and foam trucks.
- Annual inspection and maintenance of fire extinguishers and fire-fighting equipment.
- Routine inspection and maintenance of SCBA (Self Contained Breathing Equipment).
- Water mist suppression, installation and maintenance services.
- Deluge valve testing and repairs.
- Safety training.
- Short- and long-term preservation of materials for storage.
- Corrosion control.
- Tagging and stamping with client's company.
- Logo of equipment.
- Procurement/material management.

- * Extinguishers.
- * Fire monitors.
- * Fire hose reels.
- * Fire detectors.
- * Skid units.
- * Fire hoses.
- * Gas masks.
- * Alarm strobes.
- * Visual and audio strobes.
- * Fire control panel.
- * Personal protective equipment.

Fire Suppression System

Ebby-Tek Services Limited provides:

- CO2 System – Design, Installation, Commissioning, Inspection, Service and Maintenance.
- FM 200 Systems – Design, Installation, Commissioning, Inspection, Service and Maintenance.
- Clean Agent Systems – Design, Installation, Commissioning, Inspection, Service and Maintenance.
- Wet Chemical Systems (Kitchen Systems) – Design, Installation, Commissioning, Inspection, Service and Maintenance.
- Dry Chemical Systems (Vehicle Systems) – Design, Installation, Commissioning, Inspection, Service and Maintenance.

Procurement Services

With our international contact base and other strategic alliances, we assure our clients of our capability to source materials and equipment. They are assured of best price, best delivery time and best quality. Our procurement activities are driven by latest computer technology and implemented by an experienced team that is highly focused on meeting the needs of our customers.

Corrosion Management

With experienced personnel and adequate equipment in full PPE gear, using the best of processes and preservatives including high quality corrosion inhibitors, we carry out our Clean, Preserve and Protect maintenance programme on warehoused materials, installed equipment and project materials in order to ensure longevity during storage and provide adequate protection during usage. We ensure that materials, tools and equipment kept in storage outdoor or indoor are adequately protected. We offer full range of preservation programmes that suit our client's needs depending on the length of time the item would be kept in storage. Industrial, petro-chemical, and offshore facility corrosion management are carried out by our experienced team of corrosion engineers with members of the team NACE certified.

Security

In partnership with reputable internationally acclaimed security company, we offer the following range of products and services. Our team of experienced engineers and workforce ensure the safety of your personnel, goods and facility(ies) while keeping the intruders out.

Intruder Detection

- Internal and external protection.
- Internal intruder detection systems.
- Process monitoring.
- Video security.
- External beams and passives.
- Electric fencing.

Access Control

- Biometric readers
- Smart Cards
- Intercoms and video intercoms
- Mantrap doors
- Vehicle barriers
- Metal detectors and scanners
- Turnstiles
- Allow electric power gate

Closed Circuit Television (CCTV)

- Wireless cameras
- IP cameras
- Face and number plate recognition cameras
- Pan, tilt and zoom cameras
- Infra red cameras

Our Clients

- Oil and gas Production (Offshore, Onshore and FPSO)
- Gas Processing
- LNG Production and Terminals
- Financial Institutions
- Offshore Drilling
- Refining and Petrochemicals
- Power and Utilities
- Chemical Industries
- Cement, Glass and Bulk Solids Processes
- Food, Fiber and Allied Process
